Android Studio
Firebase
Sqlite
Ruby On Rails
Ruby
Sinatra
Active Record
Python
Heroku

PROFILE

A former carpenter turned web developer. I am driven to learn and build new skills, whether it be baking a pie, or designing a program. My favorite thing about programming is the seemingly infinite amount of things to learn about, combined with an eager community willing to share best practices. I am looking to find a position that can challenge me and help me grow as a developer.

EXPERIENCE

FULL STACK WEB DEVELOPER

Independent | July 2020 - Present

Developed an application from concept to deployment for Kolehuse Strategies. The application handles the hiring process of applicants, office managers itinerary, employees schedules, payroll, and reports. Hosted on AWS using Elastic Beanstalk, to easily leverage all of AWS services

TECH STACK

- Java 8
- Spring Boot
- MySQL
- Hibernate
- AWS -Elastic Beanstalk
- Javascript (jquery / ajax)
- Maven
- flyway for migrations
- css grid / bootstrap
- GitHub

FULL STACK WEB DEVELOPER

3WON llc | August 2017 - July 2020

3WON is a healthcare information technology company specializing in the collection, management, and distribution of medical professional data across the healthcare industry.

TECH STACK

- Java 8
- MySQL
- Hibernate
- Spring
- AngularJS
- Maven
- AWS
- GitHub

Day to Day Operations

- Develop and Maintain a Client and Internal facing application
- Refactor Code, Maintain readability.
- Improved Query speeds in crucial parts of the application by refactoring Hibernate calls to Native SQL
- Add New Features using CRUD and REST principles
- Bug Fixes
- Help train interns
- ETL big data sets using **AWS GLUE**
- Worked with API's like **Salesforce** to get and update clients data
