## EXPOSURE TO

Android Studio  
Firebase  
Sqlite  
Ruby On Rails  
Ruby  
Sinatra  
Active Record  
Python  
Heroku

## PROFILE

A former carpenter turned web developer. I am driven to learn and build new skills, whether it be baking a pie, or designing a program. My favorite thing about programming is the seemingly infinite amount of things to learn about, combined with an eager community willing to share best practices. I am looking to find a position that can challenge me and help me grow as a developer.

## EXPERIENCE

### FULL STACK WEB DEVELOPER

Independent | July 2020 - Present

Developed an application from concept to deployment for Kolehuse Strategies. The application handles the hiring process of applicants, office managers itinerary, employees schedules, payroll, and reports.

### TECH STACK

- Java 8
- Spring Boot
- MySql
- Hibernate
- AWS -RDS
- Deployed on Heroku
- Javascript (jquery / ajax)
- Maven
- flyway for migrations
- css grid / bootstrap
- GitHub

### FULL STACK WEB DEVELOPER

3WON IIc | August 2017 - July 2020

3WON is a healthcare information technology company specializing in the collection, management, and distribution of medical professional data across the healthcare industry.

### TECH STACK

- Java 8
- MySql
- Hibernate
- Spring
- AngularJS
- Maven
- AWS
- GitHub

### Day to Day Operations

- Develop and Maintain a Client and Internal facing application
- Refactor Code, Maintain readability.
- Improved Query speeds in crucial parts of the application by refactoring Hibernate calls to Native SQL
- Add New Features using CRUD and REST principles
- Bug Fixes
- Help train interns
- ETL big data sets using **AWS GLUE**
- Worked with API's like **Salesforce** to get and update clients data
